Entry-Level Product Engineer | After-Sales Service & Customer Success

PROFESSIONAL SUMMARY

Entry-level Product Engineer with hands-on experience in after-sales service analytics, customer query resolution, and troubleshooting IoT-based consumer electronics. Strong foundation in basic electronics, diagnostics, and technical problem-solving for AI-enabled devices. Experience building service dashboards using Power BI and SQL to improve service workflows and customer satisfaction.

TECHNICAL SKILLS (HARD SKILLS)

Troubleshooting • Technical Diagnostics • Basic Electronics & Embedded Systems • IoT Fundamentals • AI-enabled Devices • Consumer Electronics • Service Request Management • Customer Query Resolution • Product Knowledge • Power BI • SQL • Excel • Arduino • Sensors • Raspberry Pi Pico • Git & GitHub • MS Office • Jupyter Notebook • Google Colab

WORK EXPERIENCE

Design & Development Intern

First Home Fintech Solutions — Remote (Jan 2026 – Present)

• Supported product understanding by assisting in website UI improvements and resolving layout issues to enhance user experience.

• Collaborated with stakeholders to implement design changes aligned with brand standards, improving product presentation.

• Assisted in resolving user-facing issues and gathering feedback to support customer success initiatives.

• Contributed to documentation and iteration of product features based on feedback and usability observations.

PROJECTS

Customer Complaint & Service Operations Dashboard (Power BI, SQL)

• Analyzed customer complaints and service requests to identify bottlenecks in after-sales operations.

• Built interactive dashboards for service request management, resolution time tracking, and customer satisfaction trends.

• Cleaned and transformed service data using Power Query and SQL to improve reporting accuracy.

Smart Home Automation System (Arduino, Bluetooth, Relays)

• Designed an IoT-based system to remotely control appliances via mobile interface.

• Troubleshot connectivity, power, and relay issues to ensure reliable device operation.

• Implemented basic safety checks and diagnostics to improve real-world usability.

AI-Based Multi-Exposure Image Fusion (CNN, ConvLSTM)

• Built a deep learning pipeline for image fusion using CNN feature extraction and ConvLSTM sequence modeling.

• Debugged model performance across diverse scenes to improve output quality and robustness.

• Strengthened technical problem-solving through preprocessing, evaluation, and iterative tuning.

EDUCATION

Bachelor of Engineering in Electronics & Telecommunication Engineering — Vidyavardhini’s College of Engineering and Technology, Mumbai (2022 – 2026)

Higher Secondary Education (HSC) — Mount Carmel Junior College, Mumbai (2020 – 2022)

CERTIFICATIONS

• Complete Data Analyst Bootcamp — Udemy • Semi-Finalist — VCET FaceOff 2023 • Runner-Up — Oscillations Paper Presentation

SOFT SKILLS

Customer Communication • Problem Solving • Adaptability • Team Collaboration • Accountability • Time Management • Continuous Learning • Work Ethic

LANGUAGES

English • Hindi • Marathi (Basic)
