SUMMARY

Data Analyst skilled in Python, SQL, and Power BI, specializing in data visualization, dashboard development, and reporting automation. Improved efficiency and data accuracy by 30%+.

EDUCATION

B.E. Electronics & Telecommunication Engineering 2022 - 2026
Vidyavardhini's College of Engineering
CGPA: 8.0

SKILLS

Programming & Databases:	Python (Pandas, NumPy), SQL (Joins, Window Functions), MS SQL Server
Visualization:	Power BI (DAX, KPI Dashboards), Excel (Pivot, XLOOKUP), Matplotlib, Seaborn
Concepts:	Data Cleaning, EDA, Data Modeling, ETL, REST APIs, JSON, Statistical Analysis
Tools:	Git, GitHub, Postman, Jupyter, VS Code
Additional:	Deep Learning (CNN, ConvLSTM), Agile
Soft Skills:	Analytical Thinking, Problem Solving, Communication, Team Collaboration

EXPERIENCE

Design & Development Intern Jan 2026 – Mar 2026
First Home Fintech Solutions *Remote*

- Improved UI/UX increasing user engagement by 20%
- Worked in Agile environment reducing delivery time by 15%
- Documented workflows improving operational efficiency by 25%

PROJECTS

Multi-Exposure Image Fusion Model *[GitHub]*
Built deep learning model using CNN (VGG16) + ConvLSTM improving image clarity by 35% and processed 500+ images increasing robustness by 25%.

End-to-End Data Analytics Dashboard *[GitHub]*
Developed SQL-based data pipeline for reporting automation reducing manual effort by 40% and designed Power BI dashboards with KPI tracking improving decision-making by 30%.

UPI Transactions Analysis Dashboard *[GitHub]*
Performed exploratory data analysis on 10,000+ transactions identifying trends and improving reporting accuracy by 25%.

LEADERSHIP

- Secretary — ETA Committee: Led content for 10+ publications reaching 500+ students, improving engagement by 30% and reducing turnaround time by 20%.

ACHIEVEMENTS

- Semi-Finalist — VCET Face-off 2023
- Runner-Up — Oscillations Paper Presentation

CERTIFICATES

- Data Analyst Bootcamp — Udemy
