SUMMARY

Recent Engineering graduate with hands-on experience in SQL, Python, MS SQL Server, Power BI, ETL, data modeling, and data warehousing. Built end-to-end analytics solutions and interactive dashboards to deliver actionable business insights.

EDUCATION

B.E. Electronics & Telecommunication Engineering 2022 – 2026
Vidyavardhini's College of Engineering
CGPA: 8.02

SKILLS

Programming & Databases: SQL (MS SQL Server, T-SQL,Joins,CTEs,WindowFunctions,Advanced SQL), Python (Pandas, NumPy)
Business Intelligence: Power BI, DAX, Power Query, Data Modeling, ETL
Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Reporting, Excel (Pivot Tables, XLOOKUP)
Tools & Concepts: Git, GitHub, Jupyter Notebook, VS Code, Agile Methodologies,SDLC, AI/Machine Learning(ConvLSTM, CNN),REST APIs, JSON, Postman, Linux (Basics)

PROJECTS

Human Perception-Based Multi-Exposure Image Fusion Model Using Deep Learning/AI [GitHub] 2025 – Present
Python, MATLAB, CNN (VGG16), ConvLSTM

- Processed and analyzed 2,500+ multi-exposure images to improve image fusion quality using ConvLSTM-based deep learning techniques and feature extraction.
- Evaluated DeepFuse, U2Fusion, and TransMEF models using quantitative image quality metrics and contributed to an ongoing research paper and patent.

Investment Portfolio Analytics & Trade Data Warehouse [GitHub] 2026
MS SQL Server, SQL, Power BI, DAX, Excel

- Built an end-to-end investment analytics solution using a real-world stock trading dataset by cleaning and transforming data in Excel, performing ETL, and integrating 11 relational datasets into a star-schema data warehouse.
- Performed SQL analysis using Joins, CTEs, Window Functions, and DAX to build interactive Power BI dashboards tracking portfolio returns, ROI, sector allocation, trading trends, and investor KPIs for investment performance analysis.

Telecom Customer & Revenue Analytics Platform [GitHub] 2026
MS SQL Server, SQL, Power BI, DAX

- Consolidated customer, subscription, billing, recharge, and usage data across 8+ relational tables to analyze customer behavior, revenue trends, and service performance.
- Leveraged SQL, Power BI, DAX, CTEs, and Window Functions to develop KPI dashboards for churn rate, ARPU, revenue trends, payment performance, customer segmentation, and subscription analytics.

EXPERIENCE

Design & Development Intern Jan 2026 – Mar 2026
First Home Fintech Solutions (Remote)

- Collaborated with stakeholders to plan UI/UX requirements and branding elements, including website layouts, logo concepts, and business letterhead designs.
- Developed and enhanced website features, improving functionality, responsiveness, and overall user experience.

CERTIFICATIONS & ACHIEVEMENTS

- The Complete SQL Bootcamp – Udemy [link]
- Complete Data Analyst Bootcamp from Basic to Advanced – Udemy [link]
- Google Data Analytics Professional Certificate (Ongoing)
- Research Paper Author and Patent Contributor –[Information Fusion] (Ongoing)
- Semi-Finalist – VCET Face-Off 2023 and Runner-Up – Oscillations Technical Paper Presentation [link]
